MEMORANDUM FOR: Director of Central Intelligence

SUBJECT: Visit of Edwin Weisl and Cyrus Vance -
16 January 1959

1. This memorandum is for information only.
2. Subsequent to your telephone conversation with Mr. Weisl this noon, I talked further with Cyrus Vance to gain any possible leads as to any specifics and any preparations we might need to make. Mr. Vance indicated that from their standpoint the figures presented last year were still fresh enough in their minds that we need only deal with the difference between the figures as then presented and the current figures. Since this was by telephone I presume that by figures he was referring to missiles, probably long-range bomber forces and even possibly submarines. In addition, Mr. Vance indicated they would be interested in some discussion on China. This information was made available to Mr. Sheldon.
3. Mr. Vance stated that Mr. Weisl and he were still associated with the staff of the Preparedness Investigating Subcommittee and were also associated with the staff of the Space Committee, both of which are under the chairmanship of Senator Lyndon Johnson. TOP SECRET clearances on both individuals are still current.
